NEP 2020 has highlighted the need for rethinking on "education for achieving full human potential, developing an equitable and just society, and promoting national development". AICTE is making effort towards technical education which is holistic, i.e., value based as well as multi-disciplinary and taught in multiple Indian languages. Universal Human Values (UHV) through NCC-IP is effectively implementing as a systematic set of universal, rational and verifiable proposals about the human reality-about the inherent harmony in the human being, the family, society, the entire nature and existence. It draws out the value or role of human being in the harmony at all these levels, which is essentially the scope of ethical human conduct. It further helps to find resolution of present-day problems. The course employs an innovative and effective methodology of self-exploration, self-verification on one's own right. It is not a set of do's and don'ts. In this process, the teacher is also a co-explorer along with the students. It is essential to understand the meaning of "fulfilling life", "full human potential", "just and equitable society" and "well-being of all". When these meanings, understanding & values guide the actions, then the cherished purpose or goal can be realized.	Purpose and programme	Expected Participants
