Description of Activity	Vermicompost is known to be the world's best fertilizer. Our campus is having more plants, so we planned to make a vermicompost khaad project. Vermicomposting is done by either bed or kit method. In bed method composting is done on the pucca/kachha floor by making bed of organic mixture while in pit method it is done in cemented pits. To prepare these we have used decomposable organic waste such as animal excreta, kitchen waste, farm and farm residues.
